

Dastan Rakhmanzhanov

I am frontend developer from Kyrgyzstan and eager to work with company that builds interesting projects that are beneficial to society. I am experienced in designing web applications and building them in a team from scratch. Architecting scalable applications is what makes me feel engaged and interested in programming

Skills

JavaScript/ES5/ES6

HTML5/CSS3

NodeJs/Espress

React/Firebase

Education

Kapalov Eshimbek, Kyrgyzstan, Talas

Manas-Ata Sapat high school, Talas

Toktogul Satylganov #69, Bishkek

American University of Central Asia

Achievements

Golden Certificate 2019, 226 points

Languages

Kyrgyz - Native

Russian - Fluent

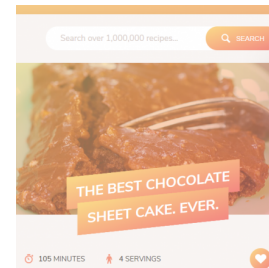

English - Conversational

Turkish - pre-intermediate

Works

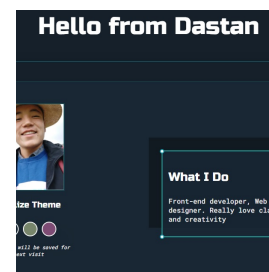

Forkify project.

Application that reads user's search query and displays recipes for meals. Working with fetch API. Sorting, Pagination, Like and Unlike, Parsing strings, Calculations and Local Storage.

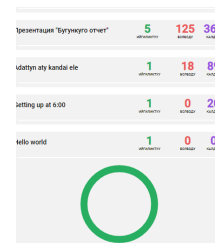

Portfolio website

My own portfolio website. Css Grid and Flex, Local storage, Dark & White mode. Progressive web application (PWA). Downloadable and speed optimized. Available for offline usage.

Habbit tracker

21 days habit - application that helps people to be aware of their progress and create new habbits. Used LocalStorage to save current progress of user. Vanilla CSS and JavaScript used to draw circle and make it interactive.
